

<u>10968BC</u>	<u>Designing for Office 365 Infrastructure</u>	<u>3 DAYS</u>	<u>SATV : YES</u>
----------------	--	---------------	-------------------

Course Description

This three day course provides guidance on designing an infrastructure that supports a quick, efficient, and painless deployment of Office 365. Every successful software deployment begins with foundation design activities that provide the blueprint for constructing the software implementation plan. This course focuses on the design activities that must be addressed to successfully deploy both basic and advanced implementations of Office 365.

Course Outline

Module 1: The Office 365 Deployment Challenge

- Reviewing Office 365
- Introducing the FastTrack Deployment Methodology
- Getting to the Pilot

Module 2: Planning the Pilot Phase

- Overview of the Pilot Phase
- Identifying Environmental and Software Prerequisites
- Planning for Pilot Users
- Planning for Team Collaboration

Module 3: Planning the Deploy Phase - Part 1

- Overview of the Deploy Phase
- Planning Service Selection
- Planning Networking and Domains
- Planning User Management

Module 4: Planning the Deploy Phase – Part 2

- Planning Email Migration
- Planning SharePoint Site Collections and sites
- Planning Lync Online
- Planning Office 365 ProPlus Deployment

Module 5: Planning the Enhance Phase – Part 1

- Overview of the Enhance Phase
- Planning Single Sign-On
- Planning Hybrid Exchange Deployments

----------------	--	---------------	-------------------

Module 6: Planning the Enhance Phase – Part 2

- Planning Exchange Online Protection
- Planning SharePoint Online Customization
- Planning Hybrid SharePoint Implementations

Module 7: Case Study

- Scenario Information Delivery
- Initial Interview with the Customer
- Creating the Pilot Phase Design
- Second Interview with the Customer
- Creating the Deploy Phase Design
- Information Gathering for the Enhance Phase
- Creating the Enhance Phase Design
- Presenting Your Design
