Course Description

Get hands-on instruction and practice administering Active Directory technologies in Windows Server 2012 and Windows Server 2012 R2 in this 5-day Microsoft Official Course. You will learn the skills you need to better manage and protect data access and information, simplify deployment and management of your identity infrastructure, and provide more secure access to data from virtually anywhere. You will learn how to configure some of the key features in Active Directory such as Active Directory Domain Services, Group Policy, Dynamic Access Control, Work Folders, WorkPlace Join, Certificate Services, Rights Management Services and Federation Services, as well as integrating your on premise environment with cloud based technologies such as Windows Azure Active Directory. As part of the learning experience, you will perform hands-on exercises in a virtual lab environment.
